

## Rotary Valve Request Form

Quantity:

What is the material being fed?

Valve size:

Valve Shape:

Airlock:

What is above the valve?

What is below the valve?

What is the height clearance?

What are the pressure measurements above and below airlock?

Temperature:

Humidity:

What is the bulk density of the material?

Particulate shape:

Is the material abrasive or corrosive?

What is the max particle size?

What flow rate are you looking for?
