Clearing the Air for a Cleaner Environment Since 1987

FIND A BAGHOUSE LEAK INSTANTLY!

Cuts detection time by 90%

Using our specially formulated fluorescent powder and an ultra-violet black light, the Dust Chaser system quickly and efficiently pinpoints leaks in bags, seams and welds, eliminating the need for time-consuming hand-eye inspections.

Easy to use

Start by introducing Dust Chaser into the dirty air stream. As the compound travels through the leaking areas and accumulates on the clean side of the collector. All bags are then inspected with an ultra-violet light. Large areas can be inspected from a single position, without need of a ladder.

The built-up compound gives off an intense fluorescent glow under the black light, pinpointing leaks in bags, seams and welds, and identifying future problem areas, eliminating unnecessary bag changes and unscheduled down-time.

Safe and dependable

The Dust Chaser system is completely foolproof, non-toxic, non-relative and simple to use.

This system works for wire cage, shaker, reverse air and cartridge-type collectors and is designed to ensure proper installation of new bags.

Suited to your needs

Dust Chaser is available in the following standard sizes, in stock, all the time.

2 lb pail - (4 per box)

5 lb pail - (4 per box)

10 lb pail - (2 per box)

25 lb pail

150 lb drum

300 lb drum
