

CLEANFLO Cartridge Collector

A Value Priced Cartridge Collector
With Exceptional Velocity

Experience Value NOW AND VALUE LATER

The USAF CleanFlo cartridge dust collector provides economical, reliable, high efficiency filtration in a compact size. Quality construction and simple design ensure long-term, trouble-free operation, superb fit and finish.

A wide variety of media and constructions are available, including:

- Cellulose/polyester blend (standard)
- Nano fiber technology
- Spunbond polyester
- Aluminized spunbond
- Spunbond w/PTFE
- Aramid

BENEFITS

- Cartridges are quickly and easily serviced from outside the collector; no confined space entry permit, respirator, etc. needed.
- Modular panelized design allows easy capacity increases. Multiple units share common hoppers and minimize clean air ducting.
- Compact design saves space and is adaptable to height and footprint restrictions.

Cartridges are market standard size (13.84" dia. X 26" long), containing 254 ft² of media area for most media and applications.

Hassle Free Dust Collection Solutions

power past your production goals

Applications

USAF dust collectors are suitable for many applications from fumes and nuisance dust to product recovery. Typical markets served include:

- Industrial Processing
- Metalworking
- Pharmaceutical
- Woodworking
- Powder Paint (ES paint)
- Laser & Plasma Cutting
- Gas Turbine
- Food
- Cement
- Shot Black
- Carbon Black
- Fumes
- Foundry
- Welding, etc.

Standard Features

- Mild steel all-welded construction with all surfaces primer coated and acrylic finish exterior.
- Ledge-free 60° hopper
- Damper pack
- Cellulose/polyester blend 80/20 cartridges
- Limited 10-year housing warranty
- Timer with enclosure

Options

- Stainless steel construction
- High temperature construction
- Direct drive fans
- Silencers
- Abrasion resistant inlet
- Air management modules
- Extended dirty air plenum
- 5 Step sloped hopper
- 2-Module hopper
- Explosion vents
- Sprinkler system
- Service platform & ladder
- Lined clear air plenum / silencing foam
- Bag-in bag-out construction
- HEPA after filter
- Custom color/coatings
- Rotary valves / screw conveyors
- Slide gates & drum cover
- Indoor / outdoor
- Solenoid enclosure (NEMA 7.9)
- Epoxy paint
- Increased & reduced leg height
